Marshal Mutisi

Software Developer & AI Automation Engineer

Harare, Zimbabwe | Remote +263 78 977 3927 mutisimarshal@gmail.com
marshal-mutisi-portofolio-1.onrender.com linkedin.com/in/marshal-mutisi-34a07a298

Technical Skills

Programming Languages
JavaScript, TypeScript, Python, Java, SQL

AI Automation & Evaluation
LangChain, LangGraph, Pydantic AI, n8n, LangSmith, OpenAI API, Anthropic API

Frontend
React, Next.js, HTML, CSS, Tailwind CSS

Backend
Node.js, Express.js, FastAPI, Spring Boot, PHP

Databases
PostgreSQL, MySQL, MongoDB, Supabase (pgvector), ChromaDB, Qdrant

Cloud & DevOps
Git, GitHub Actions, Docker, Linux, AWS (basic)

Testing
Jest, Vitest, Pytest, React Testing Library

Languages

English — Proficient (C2)

Hobbies

- Coding
- Gaming

Professional Summary

Final-year BSc Computer Science student and software developer who ships full-stack, AI-powered systems end to end, from system design and implementation through testing, evaluation, deployment and monitoring. Builds production LLM agents and automated workflows, backed by six months of professional full-stack experience on live client projects.

Education

BSc Computer Science — **2023 – 2026**
IU International University of Applied Sciences, Germany

Experience

Full Stack Development Intern — **Jan 2025 – Jun 2025**
Landsiedel NLP Training (Remote), Germany

- Built responsive web interfaces in HTML/CSS and dynamic PHP/MySQL applications across several projects.
- Turned business requirements into technical solutions, working with cross-departmental teams.
- Improved online visibility by producing SEO-optimised content with AI tools.

Projects

AI Business Workflow Automation Agent — **Aug 2026 – Sep 2026**

- AI agent that handles customer emails end-to-end: classifies each email, extracts key details, checks the CRM and company policy, then creates tickets, updates records and drafts a reply.
- Human-in-the-loop approval for uncertain or sensitive cases before anything is sent; every step is logged and shown on a live dashboard.

Tech: Python, FastAPI, Pydantic, LangChain, LangGraph, MCP, RAG (pgvector), Supabase, n8n, LangSmith, Next.js, Docker

CV Copilot — **May 2026 – Jun 2026**

- AI job-application assistant with RAG-powered CV analysis (Supabase pgvector), job-match scoring, tailored cover letters and application tracking.
- Used an ONNX embedding model to keep the full app under 512 MB, deployed with Docker on Render's free tier.

Tech: Next.js, FastAPI, LangChain, Groq (Llama 3.3 70B), Supabase, Docker
